THE *Open* GROUP

UNIX V7 Certification
For the Single UNIX Specification, Version

Test Campaign Definition Form

The purpose of this form is to identify the test suite versions used for certification testing and files to be submitted for audit. When completed, please have the form signed by an *authorized signatory* and submit it to the UNIX Certification Authority at The Open Group.

The form is organized in sections which represent the constituent product standards that comprise the full UNIX V7 Product Standard:

> Test Campaign for Internationalized Systems Calls & Libraries Extended V4
> Test Campaign for Commands & Utilities V5
> Test Campaign for Internationalized Terminal Interfaces V2
> Test Campaign for C Language V2
> Test Campaign for Role-Based Access Control (RBAC)

The UNIX Certification Authority will check the information provided and notify the applicant of approval. After receipt of Test Campaign approval, the applicant may proceed to submit the Indicators of Compliance along with a Purchase Order for the relevant certification fee.

Notes:
1. If you need more space for an answer please attach an additional page to your response and indicate by a reference a link to it.
2. If you are unsure of the complete test campaign but wish to begin uploading partial test results and supporting documentation, partially complete this form and indicate it is a draft.
